

How to Order Cell Search CTC Test

An FDA cleared Test for Metastatic Breast cancer, metastatic prostate cancer and metastatic colorectal cancer.

The CELL SEARCH CTC test can help you make more informed patient-care decision 1-3

The CELLSEARCH® CTC Test results should be used in conjunction with all clinical information derived from diagnostic tests (e.g. imaging or laboratory tests), physical examination, and complete medical history, in accordance with appropriate management procedures.

For in vitro diagnostic use.

The CELLSEARCH® Circulating Tumor Cell Kit is intended for the enumeration of circulating tumor cells (CTC) of epithelial origin (CD45-, EpCAM+, and cytokeratins 8, 18+, and/or 19+) in whole blood.

The presence of CTCs in the peripheral blood, as detected by the CELLSEARCH® CTC Test, is associated with decreased progression free survival and decreased overall survival in patients treated for metastatic breast, colorectal, or prostate* cancer. The test is to be used as an aid in the monitoring of patients with metastatic breast, colorectal, or prostate cancer. Serial CTC testing should be used in conjunction with other clinical methods for monitoring metastatic breast, colorectal, and prostate cancer. Evaluation of CTCs at any time during the course of disease allows assessment of patient prognosis and is predictive of progression-free survival and overall survival.

CELLSEARCH® CTC Test results should be used in conjunction with all clinical information derived from diagnostic tests (eg, imaging, laboratory tests), physical examination, and complete medical history, in accordance with appropriate management procedures.

*Metastatic prostate cancer patients in this study were defined as having 2 consecutive increases in the serum marker prostate-specific antigen above a reference level, despite standard hormonal management. These patients are commonly described as having androgen-independent, hormone-resistant, or castration-resistant prostate cancer. So in India your Physician can order this test through

Medilinks Inc. Cost of the test is patient those are paying individually will be Sing\$ MRP of the test is, you can pay your payment directly to them via Indian Rupees. Exchange rate will be determined the day you are paying the payment. Their contact is given below:
