#### **Note:**

- 1) Report may be delay due to any reason result may release late which we will inform you timely.
- 2) Test can perform only on Tumor tissue so we insist to handover / send only paraffin embedded tumor tissue block to us OR 15 unstained slides which has 5 microns tumor tissue. We request you kindly use charged slides only. The block will be return to you after test done.
- 3) You can't held us responsible if test fails due to scant tissue, no tumor tissue or lymph node tissue found in the Embedded paraffin tumor tissue block which you or your lab provided to us for the test.
- 4) In case of test failed you can resubmit another tumor tissue paraffin block which has sufficient invasive tumor tissue. We will ask Genomic health to run the test again.
- 5) No extra charge for resubmission of test.
